Bed sides

We can supply bed sides in any desired cross-section and surface finish: In genuine veneer with surface coating, decorative foil or leather. If required we can also include the hardware with the delivery, ready-packed.

Head and feet elements

Our diverse range of products is supplemented by head and feet elements for prefabricated beds. Decorative and technically refined, these can also be delivered as completed furniture units if required.

Door uprights and pilasters

Decorative door uprights and pilasters with high-quality surface finishes will give shape and character to all your cupboard wall panels.

Hood-moldings

Hood-molding profiles in every conceivable size, and precision-crafted facing sides, with integrated spotlights and luminaries, form the crowning finish to your wall unit.

Door handles

The function of the cupboard wall panels, especially the doors, is optimized and stabilized with sliding door handles in aluminium or wood.

Front panels for drawers

Drawers with covered front panels give the insides of the bedroom furniture a decorative finish as well.
