Cornice-moldings

We offer cornice-moldings with veneer or foil coverings in widths of your choice. If required they can be supplied as prefabricated products with, for example, solid facing edges, all kinds of recesses and holes, incl. hardware, spotlights, etc.

Front panels for doors, frames

Aluminium base material, covered with genuine wood veneer, is particularly valued for the design of high-quality, structurally complex front panels for furniture.

False edges

False edges, pilasters and other profile applications, all precision-made, including the surface finish, will add special quality to your furniture and give it character.

Framing

High-quality frames, mitred or on edge, with notches or other special wishes, and produced with craftsman-like precision, are part of our daily work.

Construction profiles

Our range of products also includes guide rails for roller shutters (shown here with a genuine aluminium foil), cover strips for locks and other structural profiles, incl. routing cuts and holes.

Furniture elements

When it comes to the production of ready-to-fit furniture elements the sky is the limit. Come to us for a provider of solutions from one source.
