complex building components

Find out what we can do!

Door coverings

We deliver decorative door coverings just-in-time coated in real veneers with finished surface or high quality finishing films (ESH, CPL, high gloss, etc).

Door bolts

We manufacture door bolts for old building redevelopment in large cross-sections out of MDF, solid wood, multiplex or plywood beams.

Door frame components

We coat door frame components in real veneer, finishing films and CPL. Corresponding door applications and extension jambs or door coatings are also part of our delivery range.

Special door profiles

We manufacture complete framing timber with lacquered surfaces (varnish, white lacquer) including counter-milling for the production of country house doors (made of solid wood, MDF, MDF/ multiplex combination).

Frame applications

We manufacture various frame applications for doors in white lacquer or veneer according to your requirements in series or as one-off products.
